SONG SA PRIVATE ISLAND, CAMBODIA

A secluded private island on Cambodia's Koh Rong archipelago, Song Sa is about as far away from the humdrum of city life as it's possible to get. Featuring 27 intimate villas that boast eco-friendly design, private pools and panoramic views, the resort reflects the island's natural beauty without compromising on creature comforts.

After honeymooning on the islands, newlyweds Rory and Melita Hunter fell in love with the location and decided to return to set up Song Saa and Cambodia's first private island. In developing the island they supported the local community, launching Cambodia's first marine reserve and providing much-needed medical outreach. They have also partnered with local growers, suppliers and fisherman to ensure that all food is sourced in a sustainable manner from the local area.
